Eduphoria.**

40+ Super-Secret

iPad Features and Shortcuts!

Great News!!

Great News! In an effort to advance training over the summer months, we are going to allow teachers and other contractual staff the ability to check out their district-issued laptop and iPad for the summer. All you will need to do is complete the following checkout form online through Eduphoria. The form simply states that you will be responsible for the devices while in your possession and that in the case of separation from the district, the district equipment will be returned. Faculty and other contractual employees will also have the ability to refuse this convenience if they want to by simply turning the devices in to the campus administration prior to leaving for the summer.

Click on the picture above or on this link to complete the form >>> eduphoria!

In order to assist with employee checkout procedures, reports will be sent to the campus administration that will include the form information and completion status of campus employees prior to the end of the school year.

Updates!

Students and teachers should upgrade to iOS 7.1.1 so that the MDM and Apple are on the same page. Please update the iOS at home. If you cannot update at home, please bring the device to your campus CIT for updating.

Teacher Shout Out!!

Timothy Spencer, AVID and science teacher at NCHS, uses Google Drive with the iPads in his classes! Way to go, Tim!

Three Tools for Improving Flipped Video Lessons

[VideoNotes](#) is a neat tool for taking notes while watching videos. VideoNotes allows you to load any YouTube video on the left side of your screen and on the right side of the screen VideoNotes gives you a notepad to type on. cument.

[Teachem](#) is a service that uses the TED-Ed model of creating lessons based on video. On Teachem teachers can build courses that are composed of a series of videos hosted on YouTube. Teachers can write questions and comments in "flashcards" that are tied to specific parts of each video and display next to each video. Students are able to take notes while watching the videos using the Teachem SmartNote system.

[Blubbr](#) is a neat quiz creation service. Through Blubbr you can create interactive quizzes that are based on YouTube clips. Your quizzes can be about anything of your choosing. The structure of the quizzes has a viewer watch a short clip then answer a multiple choice question about the clip. Viewers know right away if they chose the correct answer or not.
